MUHAMMAD ZEESHAN AKHTAR

AI/ML Engineer | Python Developer | Data Scientist

Islamabad, Pakistan | +92-349-1725364 | mianzeeshan4381@gmail.com | LinkedIn | GitHub

SUMMARY

AI/ML Engineer and Python Developer with a strong foundation in machine learning, data science, and software engineering. Proficient in Python, SQL, Scikit-learn, TensorFlow, and data analysis, with hands-on experience building ML models and integrating LLM-based solutions using RAG and prompt engineering. Skilled in data preprocessing, model evaluation, REST APIs, and full-stack application development, with a growing focus on AI automation.

EXPERIENCE

Sigma Evaluation — AI Engineer | *4 Months*

Developed AI-powered full-stack web applications and integrated AI features, APIs, and databases.

Integrated LLM-based features, including prompt engineering for user-facing AI workflows.

Built and consumed REST APIs to connect AI modules with application frontends.

2B Vision Technologies — AI Engineer | *6 Months*

Developed AI-powered applications with modern frontend, backend, API, and database integration.

Designed database structures and handled data integration between app and model layers.

Vertex Tech — Data Engineering Intern (Remote) | *1 July 2026 – 31 July 2026*

Worked on ETL, data cleaning, transformation, EDA, and ML model development using Scikit-learn.

PROJECTS

MindSense — Multimodal Depression Detection & Therapy System

Developed a full-stack AI application combining text, voice, and video for multimodal depression screening, with personalized insights and therapy support. 1st Position at IIUI Career Expo 2026.

MindSense — LinkedIn

Zufishan — AI-Powered Islamic Learning Management System

Developed a full-stack Islamic LMS featuring an AI Tutor, learner/tutor dashboards, structured learning modules, progress tracking, and English, Urdu & Arabic language support.

Zufishan — GitHub

SigmaWork — AI-Powered Career Development Platform

Developed an integrated AI platform featuring Career Coach, Resume Maker, and Interview Prep, with resume/profile-based guidance, ATS-ready resume creation, and interactive interview feedback.

SigmaWork — GitHub

TECHNICAL SKILLS

AI & Machine Learning: Machine Learning, Deep Learning, AI, LLMs, RAG, Prompt Engineering, Model Training & Evaluation

Data Science: Data Preprocessing, EDA, Feature Engineering, Data Visualization, Statistical Analysis

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Transformers, Matplotlib, OpenCV, LangChain

Programming: Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Backend Development: Flask, FastAPI, REST APIs

Frontend Development: React.js, Tailwind CSS, Vite

Data Engineering: ETL, Data Cleaning, Data Transformation, Data Modeling, Data Pipelines

Databases: PostgreSQL, MySQL, SQLite, Supabase, Vector Databases

AI & NLP: NLP, RoBERTa, Sentiment Analysis, Embeddings, AI Chatbots, Multimodal AI

Tools: Git, GitHub, VS Code, Jupyter, Google Colab, Postman

Testing: Vitest, ESLint, Unit Testing, API Testing

LinkedIn — Skills

EDUCATION

BS Software Engineering — International Islamic University, Islamabad | *2022 – 2026*
CGPA: 3.35

F.Sc Pre-Engineering — Superior College, Arifwala | *2020 – 2022*
Grade: A+

CERTIFICATIONS

1st Position – Mind Sense (Final Year Project), IIUI Career Expo 2026

Data Science & AI Certification – NAVTTC (Under NUST University)

Machine Learning Specialization – Stanford University (Coursera)

Python for Everybody – Google (Coursera)

Python for Data Science, AI & Development – IBM (Coursera)

Data Analysis with Python – IBM (Coursera)

LinkedIn — Certifications
